i-tec MySafe USB-A Easy 2.5

PRODUCT DESCRIPTION

The ADVANCE Series is the highest level of i-tec accessories bringing you the cutting edge technologies of products with a modern design and exclusive packaging.

i-tec MySafe USB-A Easy is the external enclosure for connecting 2.5" SATA disks of all capacities to your PC, notebook, TV or other multimedia device via USB interface, through which is also powered. The enclosure is also suitable for moving data from a damaged notebook. Connecting via USB 3.2 Gen 1 offers easy and high-speed data transfer (up to 5 Gbps). Backward compatibility with USB 2.0 is a commonplace.

Using is very simple, just insert the disk into the enclosure and after first connection to a computer, the drivers are automatically installed. For quick connection of disk, you can only use a separate adapter of the external enclosure or you can carry the disk safely in the enclosed plastic box.

In case of problems with the installation, technical difficulties or incorrect function of the equipment, check first for the possible solution in the FAQ tab.
