

## i-tec Thunderbolt 3 Dual HDMI Video Adapter

i-tec Thunderbolt 3 Dual HDMI Video Adapter for Thunderbolt 3 MacOS and Windows laptops and tablets, supports 2x 4K 60Hz display/TV

### PRODUCT DESCRIPTION

Expand your desktop with one or two external HDMI monitors, via the new Thunderbolt 3 connector. The adapter supports 2x 4K resolution 4096x2160@60Hz and stereo sound.

The adapter is intended primarily for devices that are equipped with a Thunderbolt 3 interface (MacBook Pro 2016, DELL XPS12, DELL XPS 13, DELL XPS 15, HP Elite X2, EliteBook Folio G1, Spectre x360, Lenovo Thinkpad P50, Lenovo Thinkpad P70 etc.). The connector has many advantages, it is smaller, symmetrical and allows easy connection, because you can rotate the connector either way.

The adapter is an excellent choice for designers, graphic designers, gamers, and other users working with more than one screen simultaneously. Its performance allows you to run the most demanding applications on one or two independent displays. It is ideal for editing 4K 60Hz video or for other Ultra HD tasks such as CAD drawings or viewing medical images. Using the "Extend" and "Mirror" modes, you can for example use applications on two monitors (e.g., wide spreadsheets), or you can work on the first screen and search the Internet on the second screen, you can compare several documents simultaneously without constant switching between the open windows, also you can display panoramic images on two screens. Operation is very simple, just plug the adapter into the Thunderbolt 3 port on your computer, connect it with a display device via HDMI cable and you can start using immediately. Driver installation is automatic.

Long product description: i-tec Thunderbolt 3 Dual HDMI Video Adapter for Thunderbolt 3 MacOS and Windows laptops and tablets, supports 2x 4K 60Hz display/TV

### PRODUCT FEATURES

- 1x integrated Thunderbolt™ 3 cable for connecting to the host device (27cm)
