

i-tec Thunderbolt 3/USB-C Dual 4K Docking Station + USB-C to DisplayPort Cable (1,5 m) + Power Delivery 60W

PRODUCT DESCRIPTION

Second-generation Thunderbolt 3 technology delivers exceptional performance, ultra-fast data transfer and support for up to 8K* resolution.

Great image quality, fast internet and the ability to transfer data at speeds of over 1GB per second even when using multiple USB ports simultaneously. You can also, of course, connect your headphones or audio and charge your laptop (60W), all using one single cable.

Thanks to the integrated DP 1.4 protocol, you can connect this dock to a monitor with a resolution of up to 8K* with a refresh rate of 30 Hz, which is equivalent to the resolution of four monitors, each at 4K resolution. This makes it the ideal solution for graphic designers, analysts, developers, film editors, or high-definition video enthusiasts and lovers.

The second generation of Thunderbolt 3 technology means that the dock is now compatible not only with Thunderbolt ports, but also USB-C and USB4, making it a flexible solution for businesses and users running laptops and tablets with different ports (however, when connected with USB-C and USB4, only one monitor will work and the Thunderbolt 3 port on the dock will transfer data at USB 2.0 speeds).

- Connect two 4K/60Hz external monitors, or one 8K/30Hz*
- Power delivery: 60W
- HDMI and Thunderbolt 3 port available**
- 2x USB-A 3.2 Gen 1 (5 Gbps) and 3x USB-A 3.2 Gen 2 (10 Gbps) with fast support lets you easily connect your USB devices and peripherals

- Gigabit Ethernet RJ-45 provides reliable, robust, high-speed Internet connectivity with support for 10/100/1000 Mbps speeds
- Combination audio and microphone jack on the front panel
- Kensington lock provides anti-theft protection, especially in shared office environments or public areas
- Supports Windows 10 / 11, macOS, iPadOS, Linux
- Includes 134W (24V, 5.6A) professional adapter and 70cm Thunderbolt 3 cable

* 8K resolution must be supported by a connected laptop or tablet.

** If connected via USB-C or USB4, only one monitor (HDMI) with 4K/30 Hz resolution is supported
