i-tec Superspeed USB-A 4-Port Hub

PRODUCT DESCRIPTION

The METAL Series is the latest line of i-tec products featuring a stylish, elegant metal design and exclusive packaging.

The i-tec USB-A Metal Charging HUB is the ideal accessory for anyone who has a shortage of USB ports on their laptop, ultrabook, or PC and is forced to constantly connect and disconnect their favorite USB devices, such as flash drives, mobile phones, tablets, digital cameras, MP3 players, printers, etc.

This HUB offers 4 USB-A ports with Plug & Play functionality and standard USB charging – the HUB automatically detects whether a USB charging device is connected. The USB 3.2 Gen 1 interface is particularly important for data transfers from USB-A memory cards and flash drives, where its high transfer speed is most useful.

An advantage is the included external power adapter, which you can use when backing up data to external hard drives or connecting more power-hungry devices that are powered directly from the USB port.

The HUB does not require the installation of drivers; just connect it to your computer using a USB cable and you can start using it right away. The hub has built-in surge protection for your computer in case of a short circuit on peripheral devices. Backward compatibility with USB 2.0 / 1.1 is a matter of course.

Thanks to its compact size and low weight, it is the ideal accessory for your laptop when traveling.

PRODUCT FEATURES

- 1x integrated USB-A 3.2 Gen 1 cable for connecting to the host device (28cm)
- 4x USB-A 3.2 Gen 1 (5 Gbps) port
- 1x Power input (DC 5V/2A)
