

i-tec USB 3.0 Display Adapter Advance TRIO

i-tec USB 3.0 Display Video Adapter
Advance TRIO DVI HDMI VGA FullHD+
2048x1152 px External graphic card

PRODUCT DESCRIPTION

The ADVANCE Series is the highest level of i-tec accessories bringing you the cutting edge technologies of products with a modern design and exclusive packaging.

This USB Display Adapter converts USB 3.0 to graphics output DVI-I. It enables you to connect one more monitor, LCD or projector to a computer with a USB 3.0 / 2.0 port. Can be used in your office (for the graphic designer, financial department, ...), you can use it for making multiple screen presentations, on fairs or for your home-use (entertainment). The adapter supports resolution not only up to Full HD 1920x1080 pixels but also up to 2048x1152 pixels. Owing to included adapters it can be used with devices equipped with VGA or HDMI connectors (LCD, Plasma TV, etc.). This USB3.0 Display Adapter enables you to connect one more monitor, LCD or projector to a computer with a USB 3.0 / 2.0 port. For desktop users adding an extra monitor via USB connection is easier than ever without having to open the computer chassis to install an internal video card. Once the installation is done, the USB-attached monitor soon wakes up. No function key hassle to swap a second monitor. The adapter is USB 2.0 backward compatible.

Examples of usage

- View your large spreadsheets across two screens with display continuity
- Multitask more effectively without overlapping windows
- Edit on one screen while surfing the Internet information on the other
- Do multiple screen presentations without bringing another computer
- Easily provide multiple screen exhibitions in a trade show
- Use second display for palettes/tools
- Get a panoramic view of large documents
- Compare two documents simultaneously across two screens
- View charts and live data at the same time
- View videos/TV on one screen and reviews on the other
